General Instructions

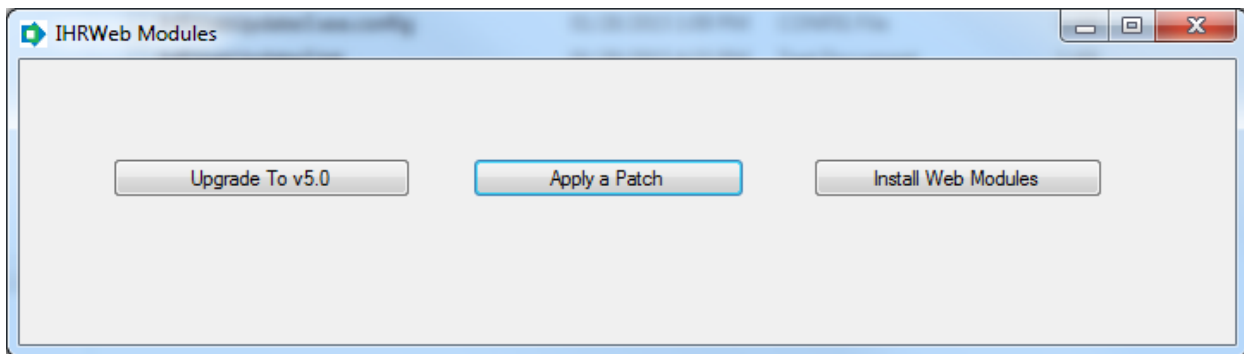

1- Please download the installer from the link below and process with the guidance from the support email.

<http://infohr.net/support/files/tmp/Updater.zip>

2-Unzip the file and place it on the server's desktop. *This exe runs on .Net version 4.0. If this platform is not installed you will not be able to run this process.*

3-Double-click on the IHRWebUpdater.exe.

4- Depending on the email sent to you, please use the appropriate action below.

"Upgrade To v5.0" is only used for the ESS and Timesheets modules.

"Apply a Patch" can be used to patch for the ESS and Timesheets modules, the Mobile ESS module, and the Applicant Tracking Web Application Form.

"Install Web Modules" will make brand new installs for the ESS and Timesheets modules, the Mobile ESS module, and the Applicant Tracking Web Application Form.

Upgrade Process

The Upgrade form has been tested with upgrading ESS and Timesheets from version 4.2 to 5.0. You can try from previous versions. If the process fails please use the manual procedure instructions. If you cannot find the manual instructions please request info:HR support.

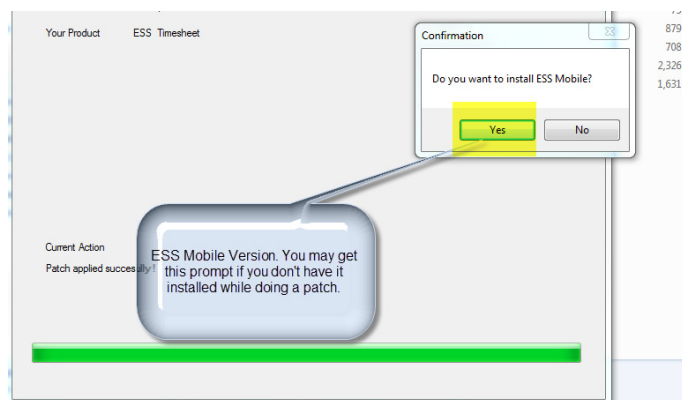

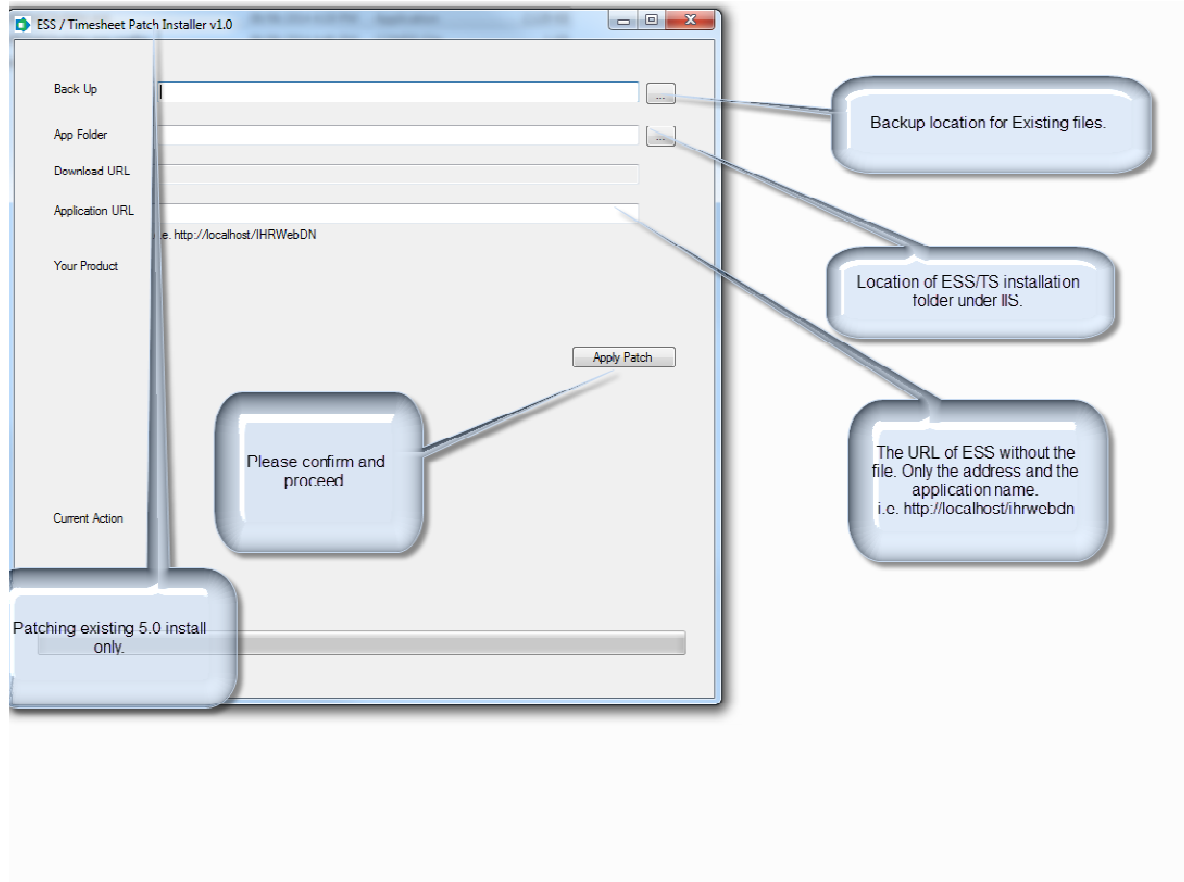

The screenshot shows a web browser window titled "Upgrade ESS / Timesheet to version 5.0". The form contains the following fields and buttons:

- Backup IIS:** A text input field with a "Browse" button next to it. A callout box points to the "Browse" button with the text: "Backup location for Existing files."
- App Folder:** A text input field with a "Browse" button next to it. A callout box points to the "Browse" button with the text: "Location of ESS/TS installation folder under IIS."
- Download URL:** A text input field.
- Application URL:** A text input field containing the text "i.e. http://localhost/HRWebDN". A callout box points to this field with the text: "The URL of ESS without the file. Only the address and the application name. i.e. http://localhost/hrwebdn".
- Your Product:** A text input field.
- Upgrade To Version 5.0:** A button.
- Please confirm and proceed:** A callout box points to the "Upgrade To Version 5.0" button with this text.
- Watch for messages:** A label above a progress bar.
- upgrade from 4.2 to 5.0:** A callout box points to the progress bar.

Patch Process

The Patch form will only apply a patches on an existing installation of ESS/Timesheets v5.0.

New Install/Implementation

The Install form is used for new installs of ESS/Timesheets only. If you are using IIS 7 or above, please make sure that you have IIS 6.0 compatibility installed, otherwise this process won't be able to complete. In that case you will have to use the manual instructions.

The screenshot shows the 'ESS/Timesheet v5.0 Installer' window. It contains the following fields and callouts:

- License String:** A large text box at the top. Callout: "License String is provided to you via email as attachment. Please open the file using notepad and copy and paste in this box."
- Product:** A label above the IIS Version field.
- IIS Version:** A text box containing the number '7'. Callout: "Email server" (pointing to the SMTP Server field).
- Web Sites:** A dropdown menu with options 'Select a Website', 'Select a Website', and 'Default Web Site'. Callout: "Select the IIS website you want to install ESS under."
- Installation Directory:** A label above the Application Name field.
- Application Name:** A text box containing 'IHRWebDN'. Callout: "Default application name is IHRWebDN. You can name it to what you want but you must use an application name."
- Server:** A text box for the database server name.
- Database Name:** A text box for the database name. Callout: "INFOHR database settings. User must be dbo owner."
- SMTP Server:** A text box for the email server address.
- UserID:** A text box for the database user ID.
- Password:** A text box for the database password.
- Multi-user:** A checkbox.
- Install:** A button at the bottom right. Callout: "After filling the form please click install."
- Status:** A label above a progress bar, with the text 'Watch for status here'.

If you have used IIS 6 to install the Mobile ESS module please add a script mapper for mvc.

c:\windows\Microsoft.NET\Framework\v4.0.30319\aspnet_isapi.dll
